

Exercise 1: Implementing the Singleton Pattern

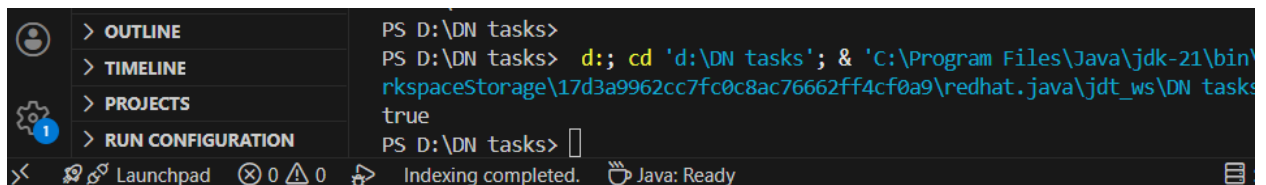

Code:

The screenshot shows the Visual Studio Code editor with a Java project named 'DN TASKS'. The Explorer sidebar on the left shows the project structure with 'Main.java' selected. The editor window displays the following code:

```
1 class Singleton {
2     private static Singleton instance;
3
4     private Singleton() {}
5
6     public static Singleton getInstance() {
7         if(instance == null) {
8             instance = new Singleton();
9         }
10        return instance;
11    }
12 }
13
14 public class Main {
15     public static void main(String[] args) {
16         Singleton s1 = Singleton.getInstance();
17         Singleton s2 = Singleton.getInstance();
18
19         System.out.println(s1 == s2);
20     }
21 }
```

Output:

The screenshot shows the Visual Studio Code terminal with the following output:

```
PS D:\DN tasks>
PS D:\DN tasks> d:; cd 'd:\DN tasks'; & 'C:\Program Files\Java\jdk-21\bin\rkspac
true
PS D:\DN tasks>
```
